Core CSL 6 Hour CEU Registration

In this Core CSL 6 hour training an individual will learn the elements of ASHRAE 62.2. Provide staff with the skills necessary to identify and inspect combustion appliances that present potential health and safety hazards. Learn the basics of air pressure and its affect on home performance. Show participants how to prepare a Lead Safe workplace and maintain quality control. This session is appropriate for those who have either a technical or non-technical background. This is a 6 hour session.

At the conclusion of this course, the student will understand:

- Understand the elements of ASHRAE 62.2
- Identify health and safety issues related to combustion equipment
- Comprehend the basics of air pressure and its affect on home performance
- Learn how to prepare a lead safe workplace and maintain quality control
