This 3-Day Crew Chief training course will provide current and potential lead staff with an understanding of the many responsibilities of the crew chief. Help them identify who the crew chief interacts and communicates with and learn about expectations of the crew chief in order for weatherization to be successful. It will also provide additional technical training in advanced blower door diagnostics, and review of current installation methodologies. This is a 3 day session primarily in class, and hands on advanced blower door diagnostic instruction.

At the conclusion of this course, the student will understand:

- The role of the Crew Chief
- Adult Learning Concepts
- Effective Crew Management
- Equipment Tracking and Maintenance
- Organization: Materials Tracking and Warehousing Materials
- Technical Expertise: Building and Safety Codes, Maintaining Quality Control, Ongoing Training, Safe Work Practices and Understanding a Work Order
